Innovative Energy Storage

Georg Dorfleitner
CEO, RAG Energy Storage

October 2018

2030+ residual scenario for electricity in AT

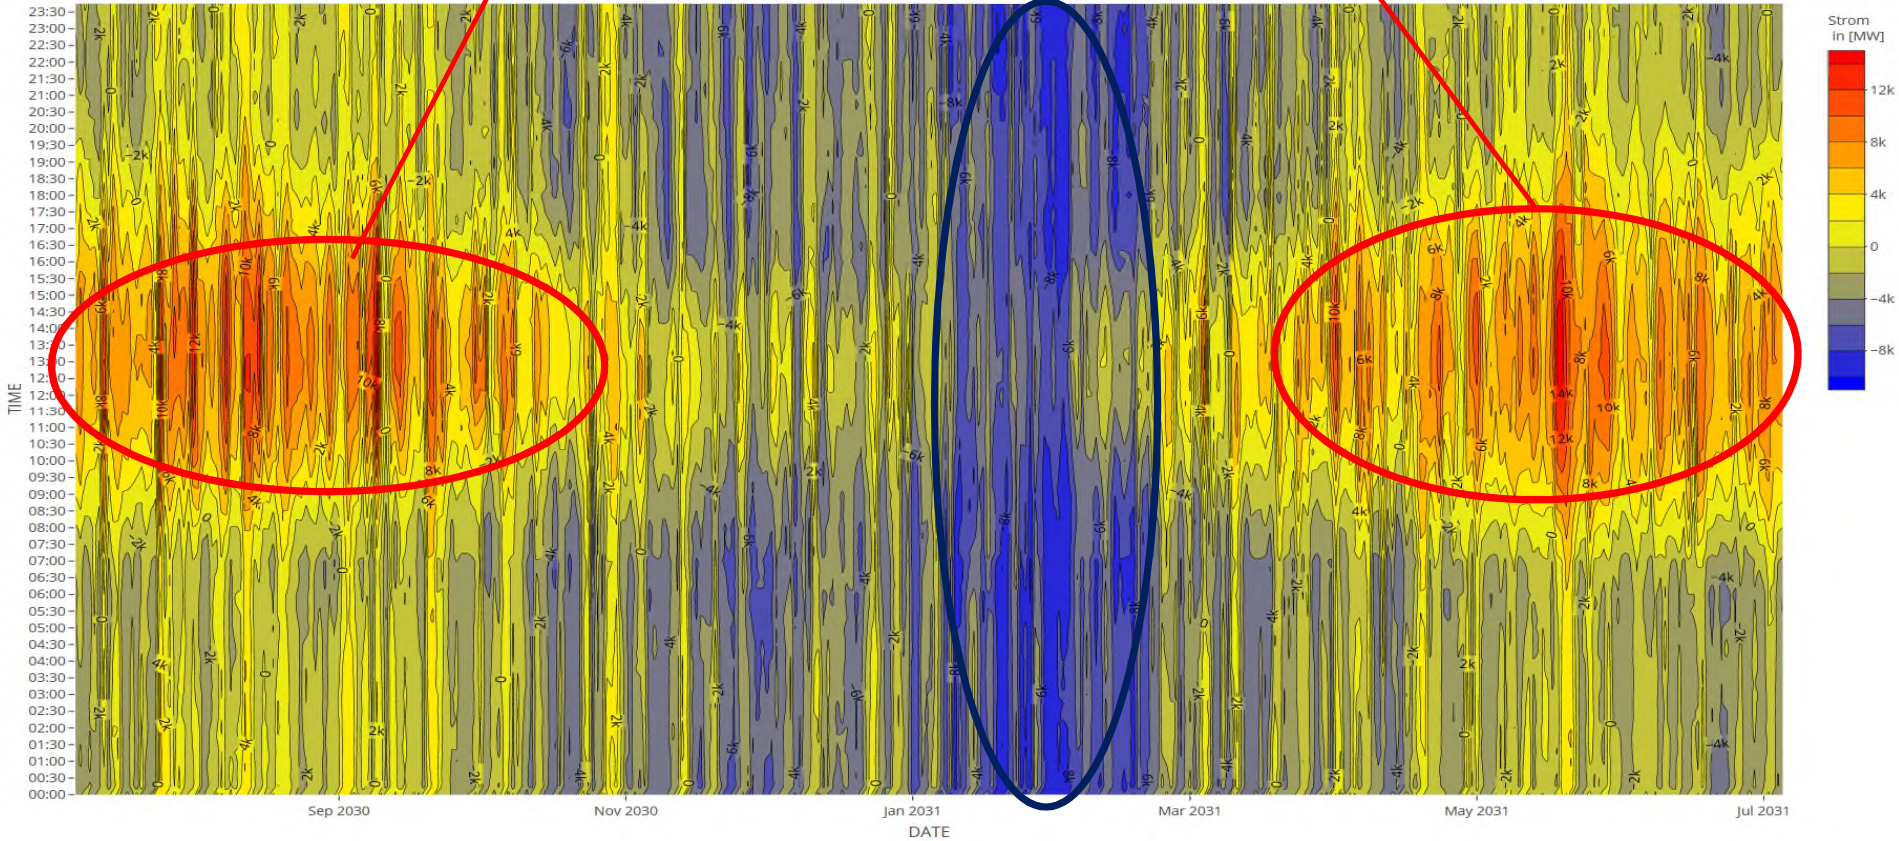

+ 12.000 MW über Monate

- 8.000 MW über Monate

+ 12.000 MW über Monate

Stromdifferenz (Prod - Verbrauch) - Outlook 2030+ AT

Quelle: Econtrol | Autor: C.T

INPUT data: 2030+ vs. 2017 @15 minute intervals:

- Demand: +30% (~63 to 81 TWh/a)
- RES production : Wind x3, Solar x20, Hydro x1 (~ 41 auf 80 TWh/a)

=> Big scale seasonal storage needed
